DIE I.

DIE II.

The following are the chief differences between the Two Dies :

DIE I.

1. The seventh and eighth lines of the background from the top converge where they meet the head, and the lines in front of the eye are not quite straight or parallel.
2. The white space in the coil of the hair above the curl is, roughly speaking, triangular.
3. The line of colour in front of the throat stops at the sixth line of shading on the neck.
4. The solid colour beneath the neck merges into the lowest line of the background in front.

DIE II.

- All the lines of the background are straight and parallel.
- The white space is oblong, with a line of colour partially dividing it at the left end.
- The line stops at the eighth line of shading.
- The solid colour stops abruptly against the *two* lowest lines in front.

Plates numbered 1 and 2 are both Die I. ; Plates 3 and 4 are Die II.

INTRODUCTION.

IN placing our 1912 Catalogue of Great Britain and Colonies before our clients, we have, on this occasion, no lists of countries to bring to their notice that have been actually rewritten. A certain amount of revising and bringing up to date has been done, but we found no country that needed rewriting; in fact, most of the British Colonies have been so much studied that there is little alteration to be made in future, beyond keeping each one up to date.

As regards prices, a good many stamps in the fine old issues have been somewhat advanced, as the tendency in these is always in an upward direction.

We find that the Colonial stamps of from about 1885 to 1890 are being rapidly absorbed, and here we have had to make many alterations.

On the contrary, the stamps of King Edward were, we find, considerably overpriced in our last Catalogue, and we have been able to buy many parcels at rates which have authorized a large number of reductions in these stamps.

The speculation in modern issues is enormous, and we find that large parcels are frequently offered by speculators from the country of issue; and also during the past year we have bought many (and been offered more) collections of these modern stamps at exceedingly cheap prices. Taking all these considerations into account, we have felt that we must reduce our quotations, in order more nearly to quote the correct market value.

Catalogue prices are for stamps in FINE CONDITION. Inferior copies can be supplied at much lower rates.

An important point to remember is that *all prices* quoted in our Catalogue are based upon *stock in hand* at the time of going to press. We do not believe in "guess-work prices," or those based upon the average of other catalogues.

ALTERATIONS IN THE QUOTED PRICES IN THIS CATALOGUE.

We reserve the right to raise or lower the prices quoted in this Catalogue without any further notice, and we give no guarantee to supply all stamps priced. The prices quoted are those at which we can supply the stamps when that particular country is written up, but that is often some months before the Catalogue is published, and the prices are subject to considerable fluctuations.

SPECIAL TERMS FOR LARGE PURCHASES.

The terms for all small orders are nett as quoted, but we have decided to allow a discount of 10% for cash purchases of a minimum amount of £10 at

one time. This discount will not apply to "current issues." *Special terms* will be quoted to those desirous of making really important purchases. These will vary according to the amount, the country, and the class of stamps required.

PRICED SUPPLEMENTS TO THE 1912 CATALOGUE.

Supplements to this Catalogue which may be issued during 1912 will be similar in arrangement to the Catalogue, and may be conveniently kept in it.

They will be sent gratis and post-free to any purchaser of this Catalogue who will fill up a form, which will be found in front of the "Great Britain" price list, and post the same to our Head Office, 391, Strand, London, England, at any time prior to the issue of our next Catalogue.

LOCAL STAMPS, ENVELOPES, AND POST CARDS.

We have to give notice that we do not stock or deal in any way in the above. Our business is entirely confined to adhesive postage stamps, such as are included in our two current Catalogues.

CHEAP STAMPS AT REDUCED PRICES.

For many reasons we cannot admit fractions of a penny in our Priced Catalogues, and we must acknowledge that in the lowest-priced stamps this presses rather hardly on a large number of young collectors.

We therefore propose to supply to *collectors* only the commoner stamps at the following reductions:—

Stamps priced at 1*d.* each will be supplied at 6/6 per 100.

„	2 <i>d.</i>	„	„	13/6	„
„	3 <i>d.</i>	„	„	21/-	„
„	4 <i>d.</i>	„	„	28/6	„

This reduction will not apply to "*current issues*" in an unused condition; these are strictly nett.

To secure this reduction a minimum number of 100 stamps of any one value must be ordered, and only one copy of any particular variety will be supplied. Each list must only contain stamps of one denomination—1*d.* stamps on one list, 2*d.* stamps on another, and so on. On stamps over 4*d.* each no reduction can be made.

Owing to the great demand for stamps at these cheap rates, we run out of many varieties very soon after the Catalogue is published, and collectors are requested to send supplementary lists of stamps of each denomination, from which we can fill up the number required, if those in the original order list should be out of stock.

It should be also stated if stamps are required in a used or unused condition.

SECTIONAL IMPERIAL ALBUM.

We call special attention to the above NEW ALBUM, just the thing that every one has been waiting for; it is PERMANENT, on *loose leaves* with a special binder, and each country is sold separately, so that a collector can pick out just those countries in which he is interested and keep them together in one or more patent covers, and not trouble about the rest of the world.

For full particulars see advertisement pages at end of this volume.

APPROVAL DEPARTMENT.

We make a speciality of the "Approval Department," from which we send out over a thousand selections of stamps per week. These consist, firstly, of

APPROVAL SHEETS,

100 stamps to a sheet, all fine specimens, and we now have about 70 different sheets, none of them containing any duplicates; so that collectors who go over these sheets will have the choice of about 7000 varieties.

Secondly we have a magnificent selection of

BLUE APPROVAL BOOKS.

These are made up for more advanced collectors, and books of any special country will gladly be sent on approval to collectors known to us or after the usual business references.

We now have over 6000 books made up, and they range in value from £8 to £500 per book.

Selections of stamps will be specially made up to suit the requirements of collectors, and no trouble will be considered too great, as we always wish to please all our clients, whatever may be the amount of their purchases.

STOCK BOOKS.

We were the first dealers to introduce the system of making up Stock Books of each country and submitting them on approval to our clients, and to-day our series of nearly 300 Stock Books are the most complete series in the world and represent a value of nearly £60,000.

These books do not contain so *many of each stamp* as formerly, owing to the fact that our Approval business has grown to such dimensions that we have had to make up a large number of Blue Approval Books from our large Stock Books. To give some idea of this business, we may mention that when we took stock in December, 1911, we had nearly £70,000 worth of stamps in small books and sheets in the Approval Department.

The large Stock Books contain about 118 pages, each page holding up to about 40 stamps.

When in stock we put in these books blocks of four, pairs, rows of shades, used and unused, plate numbers, imprints, varieties of postmark, etc.

The stamps in these books are all numbered in the margin to agree with the numbers in the current Catalogue. These Stock Books are not sent out of Great Britain.

Advanced collectors will find that an inspection of these Stock Books will enable them to fill up many gaps in their collections. A duplicate set of these Stock Books is now being made for our South American branch.

PACKET DEPARTMENT.

Our trade in Packets has increased so much in the last two years, that early in 1911 we decided to open a special department for making up our own packets. Additional offices were taken and a special staff of clerks engaged, and this Department is under the management of our Mr. Ernest Phillips.

A speciality is made of Packets containing from 250 to 10,000 varieties, and lately we have worked out a scheme by which collectors may buy these Packets in sections, and thus avoid purchasing large quantities of duplicates.

For particulars and prices see advertisements at end of this volume.

TO CLIENTS IN SOUTH AMERICA.

We have pleasure in announcing that we have purchased the business of Señor ROBERTO ROSAUER, and from September 1, 1910, have carried on the same in our own name, and under the joint management of our Mr. FRANK PHILLIPS and Señor LEON ROSAUER. This branch will hold a full stock of Postage Stamps, Sets, Packets, Albums, Catalogues, etc., and collectors in Peru, Chili, Argentine, Paraguay, Uruguay, and Brazil (south of Pernambuco) will find it quicker to order direct from this branch. ADVERTISEMENTS.

At the end of this volume a list of advertisements of Stamp Albums, Handbooks, and Stamp Collectors' Requisites should be found. This ought to be read carefully, as it may contain many things required. *Refuse to accept* any Catalogue from which the list has been removed.

All communications should be addressed to

GENERAL NOTICES.

TO BE CAREFULLY READ BEFORE ORDERING FROM THIS CATALOGUE.

TERMS.—*Nett Cash in advance*, except in the case of old and regular clients, to whom selections can be sent on approval on receipt of their "want list."

GUARANTEE.—All Stamps, etc., sold by S. G., Ltd., are *guaranteed genuine originals* in all respects. S. G., Ltd., do *not* sell reprints.

Occasionally *rare* Stamps are skilfully repaired, much enhancing their appearance in a collection. Such Stamps are, of course, much below the price of perfect specimens, and are in all cases marked on

the back
" THIS STAMP
HAS BEEN
REPAIRED."

PRICES FIXED.—All the prices in this list have been most carefully considered, and being the very lowest possible, there is no reduction. Our nett prices, taken as a whole, will be found lower than those of other dealers, even when discount is deducted from their quotations.

ORDERING.—In ordering Stamps from this Catalogue it is only necessary to give name of country, the number in the left-hand column, and to state if required used or unused. All orders should be written on slips of paper, on one side only, separately from the letter that accompanies them; the original order will then be returned with the Stamps.

THIS IS A CATALOGUE OF WHAT WE HAVE FOR SALE at the time of going to press. It is not—like many other lists—one in which the prices have been copied, or with prices fixed low to enable the dealer to buy the Stamps under their true value. The prices are based on our own stock (now estimated as worth £125,000), supplemented in the case of many difficult countries with information supplied by the leading specialists in such countries.

COLLECTORS may confidently send in their lists of wants, and depend on receiving a large proportion of the goods ordered. It is impossible to keep every small variety always in stock, and we would advise our clients to send a supplementary list of wants, to save delay.

STAMPS NOT PRICED.—A number of Stamps have no price quoted, but this does not imply that such are not in stock, but, as the price so entirely depends on the condition, no average rates can be quoted.

REMITTANCES should be made by Check or Draft payable in London, drawn to the order of "Stanley Gibbons, Ltd.," or by Postal Orders, Money Orders, etc. Small sums may be remitted in current postage stamps, *high* values preferred. Bank Notes and Stamps of Foreign Countries will only be credited at the exchange of the day.

CORRESPONDENCE in English, French, German, Spanish, and Italian.

FULL AND CLEARLY WRITTEN NAME AND ADDRESS with *every* communication will much oblige.

Address all letters, etc., to

STANLEY GIBBONS, LIMITED,
391, STRAND, LONDON, W.C.

PRICES OF RARE STAMPS.—The prices quoted for rare Stamps are for specimens in good condition, but in many instances extra fine copies bring much higher prices, and selections will be sent on request. This is especially the case in such stamps as Mauritius, Philippine Islands, New South Wales, etc., where early impressions are of a much higher order of rarity than later ones made from a worn plate. The quotations given in this Catalogue reflect the actual present condition of the market, as gathered from all parts of the world; but, as in every line of trade, prices of Stamps are subject to the law of supply and demand, and are apt to rise or fall in consequence. As a general rule the quotations given herein will be maintained until the appearance of our next edition, but special altered conditions may make it necessary to raise or reduce our selling prices in some instances.

TERMS FOR EXAMINATION OF STAMPS sent for opinion are, Cash in advance: 1/- per stamp, postage and registration extra. The Stamps should be sent lightly fastened, on sheets

with sufficient space above each Stamp for the insertion of the desired information. The following abbreviations are used in giving an opinion:—**B** Bogus, i.e. never existed. **F** Forged. **G** Genuine. **GF** Stamp genuine, surcharge forged. **R** Reprint. **W** Watermarks. If a correspondence is desired, the charge is a fee of 1/- for each letter written by us.

NEW EDITION OF THE CATALOGUE.—We get so many inquiries as to when a new edition of the Catalogue may be expected, that it is well to state here that the publication of such entirely depends on the exhaustion of the present; no fixed time can be given. It will be duly announced in *The Monthly Journal*.

“**THE MONTHLY JOURNAL**” was revived on January 31, 1911, and is published on the last day of each month. It contains 24 to 32 pages, is edited by Major E. B. Evans, and the subscription is 3/- per annum, post-free; single copies are 4d. each, post-free.

STANLEY GIBBONS, LTD., are prepared to purchase, for immediate cash, large or old Collections of Postage Stamps, also remainders of Government Stocks, any large lots of old issues, or special rarities singly. All letters and offers, with lowest price named, must be accompanied by postage for reply.

N.B.—We beg to state it is impossible to reply to queries and offers unless postage is sent. It is necessary that Orders, to be executed on the same day as received, should reach us before 10 a.m.

NEW AND PROVISIONAL ISSUES.—Correspondents in *Africa, Asia, Australia, Central and South America, and the West India Islands* are requested to send to us Stamps to the value of £1 to £5, of any provisional issues which may appear in their country, and the amount will be remitted by return mail, allowing a good bonus, according to the scarcity of the Stamps sent. Early intimation of any projected new issue or change would be valued, as we specially desire to procure early supplies of new Adhesives. Prompt cash and postage incurred are guaranteed.

APPROVAL DEPARTMENT.

We have rearranged our approval sheets of Stamps on an entirely new and much simpler plan than formerly. The Stamps are mounted on sheets, containing an average of 100 Stamps per sheet. They are all arranged in the order of our New Catalogue. First, Great Britain and the Colonies, then all Foreign Countries. These sheets contain about 7000 different Stamps, and a sheet of any particular country will be sent on demand.

The prices on these sheets of stamps are subject to 10% discount to collectors.

TO ADVANCED COLLECTORS.—For collectors more advanced we have an assortment of many hundreds of small books of choice picked Stamps of every Country or District in the world. Most of these special books contain twenty pages (5×3½ inches), and can be sent by post in an ordinary registered envelope to all parts of the world. These books, as a rule, include Used and Unused Stamps, but Special Approval Books will be made up to suit individual requirements. Collectors writing for such should state if they wish for Used or Unused Stamps; if singles, pairs, or blocks of 4 are required; also, in Used Stamps, if special Postmarks are sought for. In all cases, in these books, we shall lay ourselves out to meet the special requirements of each individual client, whether the amount required be large or small.

The prices in these special books are also subject to 10% discount to collectors.

CATALOGUE NUMBERS, AND NOT ALBUM NUMBERS.—In ordering Stamps we specially wish to state that the number in the present Catalogue must be given, and *not* the number in the “Imperial” or other Albums.

RETURNS.—All returns must invariably be accompanied with the original order sheet.

VISITORS OR COLLECTORS IN LONDON, on calling at 391, Strand, W.C., can, at all times during office hours (10 a.m. to 6 p.m.; Saturday, 10 a.m. to 1 p.m.), inspect some hundreds of collections and stock books of Stamps, having each variety priced, and thus get a far better selection of shades and varieties than those who order by post.

SETS AND PACKETS OF STAMPS.

A special Prospectus containing full details of about 1000 Sets and Packets of Stamps will be sent post-free on application.

We strongly recommend our Sets of Stamps. They are composed of perfect specimens, and are priced at from 20% to 40% less than the Stamps could be bought for singly.

WATERMARKS.

w. 1

w. 2

w. 3

w. 4

The watermarks in the stamps printed by Messrs. Perkins Bacon and Co. for various British possessions were (w. 1) *Large Star*, measuring from 15 to 16 mm. across the star from point to point, and about 27 mm. from centre to centre vertically; (w. 2) *Small Star* of similar design, but measuring from 12 to 13½ mm.

w. 5

w. 6

w. 7

w. 8

from point to point, and 24 mm. from centre to centre vertically. The Large Star paper was made for long stamps like Ceylon and St. Helena, the Small Star paper for ordinary size stamps, as Grenada, Barbados, etc.; consequently, when the former was used for the smaller stamps, the watermark only occasionally

comes in the centre of the paper, and frequently is so misplaced as to show portions of two stars above and below (this eccentricity will very often determine the watermark when it would be difficult otherwise to test it); and (w. 3) Broad Star, in which the points are broader. The watermarks in the stamps printed by Messrs. De La Rue and Co. for various British possessions—not exclusively used for one colony—are (w. 4) a Crown over "CC" (Crown Colonies) for the stamps of ordinary size, and (w. 5) for the stamps of larger size, and (w. 6) a Crown over "CA" (Crown Agents). There is also another (w. 7) properly described as "CA over Crown." This watermark was specially made for paper on which it was intended to print long fiscal stamps of the size and shape of those (which have been used postally) in Sierra Leone, Western Australia, etc. It occupies twice the space of the ordinary Crown CA watermark. When postage stamps are printed on paper with this watermark, the watermark is *sideways*, and it takes a horizontal pair of postage stamps to show the entire watermark.

In 1904 a new watermark (w. 8), described as "Multiple Crown CA," was introduced. On stamps of the ordinary size portions of 2 or 3 watermarks appear, and on the large-sized stamps a greater number can be observed.

PERFORATIONS.

"Guillotine" perforation consists of a line of holes made by one stroke of a single-line machine; "comb" consists of a long single line, and short lines at right angles, made by one stroke of a triple-cutting machine that perforates three sides of the stamps in one row at one stroke—this row may be either a vertical one or a horizontal one; "harrow" perforation is done by a machine that perforates an entire sheet of stamps at one stroke. The earliest machines were used at Somerset House (Inland Revenue Department), and were comb machines giving gauges of 16×16 or 14×14 for the stamps of ordinary size, and $15\frac{1}{2} \times 15$ for the larger-sized stamps. The machines used by Messrs. Perkins Bacon and Co. were single-line ones, and may be divided into (1) perforation gauging from 14 to 16, which may be either "clean-cut" or very rough or intermediate, all well-defined states indicating the period at which the perforation was made; (2) perforation gauging 11 to $12\frac{1}{2}$, irregular but clean-cut; (3) perforation about 15, varying very little and clean-cut in character; (4) perforation gauging about $14\frac{1}{4}$, small holes, and only used for Grenada. In later years two new perforations have been used by these manufacturers gauging $11\frac{1}{2}$ and $12\frac{1}{2}$, but these have never been used on stamps which were perforated as above mentioned. Messrs. De La Rue and Son have used machines gauging 14 (both guillotine and comb) and guillotine machines gauging $11\frac{1}{2}$ to 12 irregular clean-cut, 13 very regular, rough perforation, $12\frac{1}{2}$ and 12, this being the chronological order in which these machines were first put into use; compounds of 14 with $12\frac{1}{2}$ and 14 with 12 are also found. The perforation found on the stamps manufactured by Messrs. Bradbury, Wilkinson, and Co. (the stamps of British East Africa for example), although usually described as "14," is really nearer $14\frac{1}{4}$. The modern stamps printed by Messrs. Waterlow and Sons (such as Niger Coast, New Zealand, North Borneo) have all single-line perforation, which is sometimes very irregular, gauging from $12\frac{1}{2}$ to 14 or 15 in the same line of perforation, but more often (especially latterly) gauging from 15 to $15\frac{1}{2}$; all the machines make very small holes.

NOTE.—Stamps in the Catalogue not described as "*imperf.*" or "*perf.*" are to be taken as imperforate.

STAMPS AND
STAMP COLLECTING

BY

MAJOR E. B. EVANS.

THIS Work is intended to fill a void which has hitherto existed in the Philatelist's Library. THE
MONTHLY JOURNAL

Edited by MAJOR E. B. EVANS

Published on the last day of every month.

THIS is the largest and most important Stamp Magazine published, and we hope that all our clients, who receive a specimen copy, will not only subscribe, but will endeavour to persuade at least one stamp-collecting friend to become a subscriber also.

The larger the subscription list, the more information and original articles we shall be enabled to give our readers.

We have arranged for important serial articles from, amongst others, Major E. B. Evans, Messrs. L. Hanciau (for over thirty years editor of *Le Timbre-Poste*), Pierre Mahé (the leading French Philatelist), Dr. José Marcó del Pont (the Father of South American Philately), Mr. F. J. Melville (the President of the Junior Philatelic Society), and Mr. Charles J. Phillips (Chairman of Stanley Gibbons, Ltd.).

The Monthly Journal is profusely illustrated, and a speciality is made of full-page illustrations on art paper.

The Chronicle of New Issues. One of the most complete, and full of early and exclusive information.

Topical Notes on the events of the day, with much useful information to all collectors.

Foreign Notes. Useful extracts from the World's Press.

Numerous Articles by well-known writers on Philatelic subjects.

Meetings of all Philatelic Societies are fully described each month.

A speciality is made of **letters from correspondents** in all parts of the world.

Nearly every month a **Special Bargain** is offered to subscribers. These are real bargains, lots we pick up in the course of business, which, to make a quick sale, we offer at from one-half to one-quarter of regular catalogue rates. These **Bargains** consist of stamps from 6d. to several pounds each.

PREPAID SUBSCRIPTIONS must commence with the current number.

The ANNUAL SUBSCRIPTION is 3/=-, post-free; single copies of current volume, price 4d. each, post-free.

The Monthly Journal is produced in order to help and encourage those who are either now forming a collection or are about to start the most fascinating and fashionable hobby of **Stamp Collecting**.

I.—LINE-ENGRAVED STAMPS.

(Engraved by Mr. Frederick Heath and printed by Messrs. Perkins Bacon and Co.)

(A) Letters in the lower, Maltese crosses in the upper, corners of each stamp.

1 MAY, 1840. Wmk. Small Crown, Type 2. Imperf.

No.	Type.	Un.	Used.
		s. d.	s. d.
1	1d., intense black (early impression) 25 0 1 0
2	" 1d., black 25 0 1 0
3	" 1d., grey-black (worn plate) 50 0 6 0
4	" 2d., deep full blue (no white lines) — 6 0
5	" 2d., blue	{ " " }	.. £3 5 0
6	" 2d., pale blue	{ " " }	.. — 8 0

So-called reprints of the 1d., black, were made in 1864, but inasmuch as they were printed from a plate constructed from Die II., and on paper watermarked with the Large Crown then in use, they are really Government imitations. They were also printed in *carmine*. The watermark on the black reprints is always found inverted.

The 2d. stamps were printed from two plates (Nos. 1 and 2) which differ slightly in the position of the corner letters. If two stamps are found with the same letters, but showing a variation, they are, of course, from different plates.

20 JANUARY, 1841. Same wmk. Imperf. (a).

7	1	1d., red-brown (paper quite white) 60 0 5 0
8	"	" 1d., " 3 6 0 1

15	"	" 2d., deep full blue (b) 35 0 0 6

(a) From 1841 to 1857 the 1d. and 2d. stamps have the paper more or less *blued*, caused by action between the colouring matter and the paper; the gum has nothing to do with it.

The varieties of colour and shade of the 1d. (Nos. 8-12) are almost innumerable, those given above representing *classes* rather than any particular varieties. This applies to all stamps that have been

No. Type.

in use for a considerable time, particularly where the use has been extensive and many printings have been made. Varieties are known with inverted letters in the left lower corners. (See *Monthly Journal*, December, 1906, and January, 1907.)

(b) These 2d. stamps are also printed from two plates (Nos. 3 and 4), and the same remarks apply as in the note above.

1848-50. *Rouletted 12, by Archer.*

16 | 1 | 1d., red-brown

Although the various trials of machines for rouletting and perforating were unofficial, Archer had the consent of the authorities in making his experiments, and the bulk of the sheets so experimented upon were afterwards put in use by the Post Office. Specimens perf. 16 by Archer's third machine should be dated prior to January 28, 1854.

DIE I.

DIE II.

Die I. is the original die, in use from 1840 to 1855. In Die II. the shading about the eye is more defined, the nostril is more curved, and the band behind the ear more distinct.

Die II. is a re-engraving of Die I. made by Mr. William Humphrys.

(k) Only 1200 or less were ever issued. Of this stamp and others catalogued, marked with stars (*) in the price columns, only some of the surplus sheets prepared for registration were issued to the public; they are of the greatest rarity, in some cases only single specimens being known.

(l) The hair lines are white, and are drawn across the exterior angles of the square spaces for the corner letters. They are rather faint in the 6d., but much better defined in the 9d.

The 3d., Type 21, but with network background in the spandrels, which is found overprinted "SPECIMEN," was never issued.

(j) Of the 1s., plate 3, in this set, only one pane of 20 was perforated, but was never issued. Plate 2 is numbered "1" on the stamp, and plate 3 is numbered "2."

After 1st January, 1911, these stamps were printed by Messrs. Harrison & Sons from the old plates. In some values they may be distinguished by slight shades and general appearance, but are impossible to describe satisfactorily. No chalky paper was used for these printings.

The watermarks of the stamps printed by Messrs. Perkins Bacon and Co. and by Messrs. De La Rue are illustrated on pages xiv and xv of the introductory matter preceding the Catalogue, and for purposes of reference are numbered "W. 1" to "W. 8."

It appears that the patent fugitive colours of Messrs. De La Rue and Co. were not found to be quite a sufficient safeguard in the case of stamps used for both postal and fiscal purposes, or that so many different values were used for both purposes that it is impossible to find a sufficient number of different fugitive colours to distinguish them. Consequently the ordinary paper, both for the stamps of Great Britain and for those of the Colonies, has been gradually superseded by a *chalk-surfaced* paper, from which it is impossible to remove any form of obliteration without at the same time removing the impression of the stamp. The watermarks have remained unchanged.

The majority of the values of the 1902-10 issue

of Great Britain, as well as of most of the Colonies, have appeared upon the surfaced paper. The amount of chalk-surfacing is so very variable that in *used* copies it is sometimes impossible to detect it.

From 1907-1908 the stamps in "single colours" were printed on unsurfaced or ordinary paper and bicoloured stamps on the surfaced paper, this rule being generally adhered to side by side with the "universal" colour scheme which is gradually being adopted throughout the Crown Agencies.

We have decided *not to list* the varieties on the new paper, separately, in the Catalogue, but we have indicated the existence of the papers by the letters "O" (*ordinary*) and "C" (*chalky*) after the description of all stamps where it is possible for the chalky paper to occur. The two letters together of course signify that the stamp exists on both papers. The price quoted is that of the cheaper variety, it in most cases being that on the *chalky* paper.

In some cases also stamps printed on paper watermarked Crown CC, Type w. 5, or CA over Crown, Type w. 7, have "chalk-surface." In such cases we have added "O" and "C" as above, but where no value of the set has appeared on this paper no indication is made.

In the case of those colonies whose stamps have hitherto been printed from "head" and "duty" plates at two operations, new combined plates are gradually being made for the monocoloured stamps, and the ½d. values can usually be distinguished, where they have appeared, by the colour being a more bluish green, whereas stamps printed in two operations often showed two distinct shades.

The 2, 3, and 5 r. are overprinted in larger type than the lower values, but they are also known with the smaller overprint; but these last were—as far as we know—*not issued* for postal purposes.

Pelure paper.

These stamps were initiated by the postmaster, or the Post Office clerks, before they were issued. The initials are—E. T. E. D(alton), E. D. W(ight), J. B. S(mith), H. A. K(illikelly), and W. H. L(ortimer). There are several types of each value. Prices vary so much according to condition, that no average price can be quoted.

9	1 c., black on magenta	—	£10
10	4 c., " deep blue	—	£12

There are two varieties of type for each value. Reprints of both stamps were made in 1865; they are printed on thicker paper and perforated 12½, but specimens are frequently seen with the perforation removed.

15	4 c., deep blue	120 0	30 0
16	4 c., blue	—	35 0
17	4 c., pale blue	—	32 6

With the exception of No. 11 these stamps are generally found with traces of a white line above the label of value, but some have practically no line showing.

It is believed that the large "O" and small "o" were arranged in alternate rows on the sheet. (See illustration in *M.J.*, vol. v. p. 191.)

Both values were reprinted in 1865 on thin paper and perforated 12½. The colour of the 1 c. is orange-red, and that of the 4 c. sky-blue. As in the case of the reprints of the 1852 issue, specimens are found with the perforation removed.

NOTE.—The stamps of the last group were printed from the same plate as the first, but the values of the last three stamps in the bottom row of the sheet were altered to “9d.” by inserting figures “9” in place of the figures “3.”

There are no reprints of these stamps, but the 1d., 3d., 6d., and 1s. are known in the correct type on *yellow wove paper* and are probably *proofs*. There are also two different sets of imitations made by the proprietors of *The Fiji Times* to meet the demands of collectors. The first of these were made in 1876 and are on *vertically laid paper*, *imperf.* and *pin-perf.*; these are smaller than the originals. The others were made later and are on thick *wove paper* of a deep *rosy mauve* colour.

No. 9 of the Stanley Gibbons Philatelic Handbooks, on the Stamps of

FIJI ISLANDS.

By CHARLES J. PHILLIPS.

With numerous Illustrations, and also 15 full Plates of Photogravure Reproductions.

THIS entirely new work is the same size and form as the publications of the Royal Philatelic Society.

It is divided into fourteen chapters and three appendices.

The two plates of the *Fiji Times* Express stamps are illustrated, and their history is given in full. The rare "V.R." overprints are all plated for the first time, the different settings are illustrated, and the position on the plates of all the errors in the overprint has been determined.

In the following issues the conversion of the blocks of the "C.R." stamps into those of "V.R." by means of the insertion of wooden plugs is fully explained for the first time, and there is much interesting new information about the later issues, with description and illustrations of essays and proofs, also of Duty, Frank, and Cake Fair Stamps.

No. 7 of the Stanley Gibbons Philatelic Handbooks, on the Stamps of

GRENADA.

By E. D. BACON and F. H. NAPIER.

THIS work is one of the most important and interesting that we have published up to date, as it comprises not only an exhaustive history of the stamps of Grenada, with their many intricate and minor varieties, but gives also a full and reliable history and list of all the stamps that have been perforated by Messrs. Perkins Bacon and Co., clearing up many points that have hitherto been in dispute amongst Philatelists.

The Handbook is illustrated with nine full-size autotype plates, viz. :—Two plates of the "A" and "B" perforating machine, two plates of "perforations," three plates of the "Star"-watermarked papers, and two plates of Grenada stamps; also a large number of illustrations throughout the text.

Besides the type shown above, which is the commonest, there are in this printing three or four minor varieties differing in the shape and size of the body of the letter. In this setting are also found at least two varieties very like the upright "antique" of the first printing of the small capitals.

The stamps of Griqualand West became obsolete in October, 1880, when the stock on hand of Cape stamps overprinted with small "G" was returned from Kimberley to Cape Town and redistributed among various post offices in Cape Colony, where they were used as ordinary Cape stamps.

HELIGOLAND.

NOTE.—All our Heligoland stamps have been carefully examined by a leading expert, and are guaranteed genuine originals, both as regards the postmarks and the stamps. The sets commonly offered at a few shillings are either reprints or

No. forgeries, and, even if the former, are of no value, as they were printed off as required by a German dealer.

The Postage and Telegraph Stamps of BRITISH INDIA.

With 23 full-sized Plates and numerous other Illustrations.

PART I.

POSTAGE STAMPS.

By L. L. R. HAUSBURG.

PART II.

TELEGRAPH STAMPS.

By C. STEWART-WILSON and C. S. F. CROFTON.

THIS is the first handbook that we have produced for the Philatelic Society of India, and we trust that it will be considered a credit both to the Society and to our own firm. The volume contains 215 pages, similar in size and get-up to the publications of the Royal Philatelic Society, London.

The important plates have been produced by the photogravure process; this is very costly, but gives the most magnificent results. The cost of the plates and other illustrations has exceeded \$2000.

There is an immense amount of new information in this volume, and especially important are the numerous retouches discovered by Mr. Hausburg in the stamps of the first issue.

Important chapters are those dealing with the Essays, Reprints, and Forgeries.

SERVICE.

Indian stamps overprinted with the above were employed by the Public Works Department of Jeypore, but the overprint appears to have been intended rather to prevent theft of the stamps than to distinguish them as an issue for the State, and to be more of a private nature than an official one. In this plate there is a slanting dash under and to left of the letters "JA" of "JAHAN," instead of a character like a large comma, which exists on all the previous varieties of this design.

1895. Type 5 again redrawn; 8 varieties. Laid paper.

In these cases where the same design has been redrawn several times, and each time in a number of varieties of type, it is very difficult for the general collector, who collects only single specimens, to distinguish the various issues. Nos. 11 and 12 may be distinguished from Nos. 21 and 24 by the presence or absence of the parenthesis marks (); 13, 17, and 23 differ principally in colour, and 13 and 29 are very much alike, but differ in value as well as in paper.

Some of the previous stamps remained on sale (and probably in use) after the issue of the series of 1902, and some of these were afterwards put on sale with the new form of embossing; fresh plates were made of some of the old designs, in imitation of the earlier issues, and impressions from these were also sold with the new embossed device. The ordinary postal issues of Bhopal having become obsolete since July 1, 1908, we think it well to give a list of all these varieties, so far as they are known to us. It is said that all were available for postal

use, but there is no doubt that they were made primarily for sale to collectors, and we should recommend the general collector either to ignore them altogether, or only to accept specimens that have passed through the post. We do not propose to allot separate spaces to them in the Sectional Imperial Album.

All the above stamps are lithographed in large sheets, containing as many varieties of type as there are stamps on the sheets. Of No. 10 there are 104 varieties, and of each of the others 120. Nos. 17 and 18 were printed from the same stone. The shape of the dagger is, of course, not identically the same all over the sheet, but Nos. 5, 6, 7, 8 represent different sheets. No. 14 is rather smaller than any of the rest of that issue.

The stamps of Bundi became obsolete in the latter part of 1902.

All the above were in sheets of 24, and were no doubt printed at a comparatively early date, being uniformly on *laid* paper. They seem to have been *overprinted* and perforated as required. Those first issued for use were *perforated*, but they were subsequently supplied *imperf.*, both to collectors and for use, and some of the last supplies of certain values were *pin-perf.*, or rouletted, like the later types. No rule seems to have been observed as to the colour of the *overprinted* monogram; *pale blue, rose, and mauve* were used from the first. The *pale blue* varies to *greenish blue* or *blue-green*, and appears quite *green* on the *yellow* stamps. The *dull rose* may be put down to bad ink, and the *lake* is possibly a mixture of the *mauve* and the *rose*—it is a quite distinct colour and apparently later than the others. Specimens without overprint are no doubt copies that have escaped accidentally; they have been found sticking to the backs of others that bore the overprint.

Varieties may also be found doubly overprinted, in two different colours.

The stamps of Bussahir have been obsolete since March 31, 1901. Some of the varieties listed above have been received since that date, but they are probably remainders. Others that have been recently noted we have not included, as we believe them to be reprints, wholly or partially. These bear the monogram "P. S.", the initials of Padam Singh (who succeeded Raghunath Singh in the direction of the postal service), which has been struck upon what are probably remainders of the stamps, and also upon recent impressions of the ½ a. and ¼ a., Types 11 and 12, upon *laid* paper. Other varieties, of a similar nature, will probably appear, as the original remainders must be nearly exhausted.

The figure on the stamps is intended to represent the Hindu divinity "Ganesh" or "Ganesa."

All the stamps of Duttia are impressed with a circular handstamp (as a rule in blue) before issue.

This handstamp is an impression of the seal of Sir Bahwani Singh, and has a figure of "Ganesa" in centre, surrounded by an inscription in Devanagari.

It is doubtful whether stamps of Type 3 were ever used for postage.

These stamps became obsolete upon the introduction of the surcharged Indian stamps on 1st January, 1887, and it is now known that the impressions of these types in various colours, the ½ anna labels, and the later printings from re-engraved dies (which were formerly believed to have been employed for local postage), were never in circulation at all.

Reprints also exist in great abundance and in numerous fancy colours, both on *native* paper, usually thinner and smoother than that of the originals, and on thin wove European papers, on which the originals were never printed. There are also imitations, which were found among the official stock, on native and on European laid and wove papers, which can be recognized by their not agreeing in type with the illustrations given above. The circular and rectangular stamps listed under the heading "Special Printings" did not supersede those in red, which was the normal colour for Jammu down to 1878. It is not known for what reason other colours were used during that period, but these stamps were printed in 1874 or 1875 and were certainly put in use. The rectangular stamps were again printed in black at that time, but impressions of the two periods can only be distinguished by the obliterations, which until 1868 were in magenta and after that in black.

There are reprints of these, in oil colour, brown-red and bright blue, on native paper; they are very clearly printed, which is not the case with the originals in oil colour.

Variety. Tête-bêche (pair).

101a 4 a., green

Of the above, the $\frac{1}{2}$ a., 1 a., and 2 a. were printed in strips of five varieties, the $\frac{1}{2}$ a. in a block of twenty varieties, and the 4 a. and 8 a. from single dies. Recent research seems to show that the varieties hitherto catalogued upon European papers were never put in circulation, though some of them were printed while these stamps were still in use.

III. FOR JAMMU AND KASHMIR.

In the following issues there are 15 varieties on the sheets of the $\frac{1}{2}$ a., $\frac{1}{2}$ a., and $\frac{1}{2}$ a.; 20 varieties of the 1 a. and 2 a., and 8 varieties of the 4 a. and 8 a. The value is in the lower part of the central oval.

These three papers seem to have been used at first indiscriminately, the ½ a. and 1 a. on thin wove having been found on letters of 1878. A little later the use of the thicker papers was given up (almost if not quite entirely), and all the varieties that follow are on thin paper, of various qualities. All the following are *imperfect*.

marked; they may be detected by the type, which does not agree with any variety on the genuine sheets, and also in the low values by the margins being filled in with colour, all but a thin white frame round the stamp. The forgeries of the 8 a. are in sheets of eight, like the originals. Fresh forgeries of nearly all values have recently been seen, showing all varieties of type. Type 19 represents a ½ a. stamp, which exists in sheets of twelve varieties, in red and in black, on thin wove and laid papers, also in red on native paper, but which does not appear ever to have been issued for use. It was first seen in 1886. The ½ a., brown, and the 4 a., green, exist on ordinary white laid paper; the ½ a., red, on native paper; the ½ a., in bright green, on thin white wove (this may be an error in the colour of the 4 a.); and the 8 a., in lilac, on thin white wove. None of these are known to have been in use.

These stamps have not been used for postal purposes since July, 1885, but it is said that they are still employed as fiscals. Other varieties exist, but they must be either fiscals or reprints, and it is not quite certain that all of those listed above were issued as early as 1885.

All the stamps of Jhind were lithographed by the Jhind State Rajah's Press, Sungroor.

These were originally made as *reprints*, about 1891, to supply collectors after the first issue was exhausted, but there being very little demand for them they were subsequently put into use. The original stone having been cleaned off, the design was copied (perforations and all!) from an illustration cut from a dealer's catalogue.

There are two distinct varieties of the 3 p. and 6 p., as shown in Types A and B, C and D. The 1d. stamp of this issue was bisected and used
as a ½d. in 1883. This bisected stamp is often seen
surcharged with a small "½" in black; such sur-
charge is bogus. The 6d. in blue-green is only
known unused and is probably only a proof, and is
therefore omitted. Price 12/6, unused.

This occurs on the second, fourth, sixth, etc., stamps of the first vertical row of the right-hand pane. It was very soon corrected.

In some printings a broken "E" (with the top limb removed) appears to have been used instead of "L" in "HALF" on the last stamp in the sheet.

The above stamps are printed on paper borrowed from Victoria, and as it had to be cut in two to fit the New South Wales plates, the watermark on some sheets is very much out of centre.

These stamps are known in sheets in which two of the lower rows are watermarked with the words "COMMONWEALTH OF AUSTRALIA" instead of Crown and "A," so that portions of one or more letters can be distinguished on a single stamp. Two stamps of the row were without any watermark.

This perforation is made by a horizontal "comb" machine, giving a gauge of 12 horizontally and about 11½ vertically. Single specimens can be found apparently gauging 11½ all round or 12 all round, but these are all from the same machine.

The dies of the 1d., 2d., 6d., and 8d. were retouched in 1891-92 and new plates made, but the differences are not sufficiently marked to enable us to catalogue them as separate varieties. The stamps perf. (a) and (b) are usually from the original plates, while those perf. (c), (d), and (e) are mostly from the new plates. Perf. (d) is also known 11 × 10 but stamps perforated thus are rare.

The above ½d. stamps are slightly smaller than those of the previous printings. A new plate was made to print 240 stamps instead of 120 as previously, and to make these fit the watermarked paper the design was slightly contracted at the borders, the centre vignette remaining as before. The stamp varies in shade from *very deep green* to *pale yellow-green*. The 2d. stamp is also from a new and smaller plate.

There are two sizes of paper used for the above stamps, viz. :—

(1) A sheet containing 240 wmk., with a space of 9 mm. between each.

(2) A sheet containing 120 wmk., with a space of 24 mm. between each.

Size (1) is used for the ½d., 1d., 2d., and 4d., and size (2) for 2½d., 5d., 9d., and 2s. The paper in each case exactly fits the plates, and has the watermark in register, though in the case of the 4d., the plate of which contains only 80 stamps, the paper is cut up to print it. The 3d., 6d., 8d., and 1s. are printed on variety (1), but with watermark sideways: by reason of this specimens from the margins of the sheets show parts of the words "NEW ZEALAND POSTAGE" in large letters, and some copies have no watermark at all. For the 1½d. and 5s. stamps variety (1) is also used, but two watermarks appear on each stamp. The 6d. also

This plate has a minute dot almost in the centre of the spaces between the stamps in the horizontal rows, but it is frequently cut out by the perforation.

In 1906 fresh printings were made from four new plates (*without* the minute dot mentioned above), two of which, marked in the margin "W 1" and "W 2," were supplied by Messrs. Waterlow Bros. and Layton, and the other two, marked in the margin "R 1" and "R 2," by Messrs. W. R. Royle and Sons. The intention was to note which pair of plates wears the best and produces the best results. The stamps are printed in *rose-carmine* on paper with wmk. Type 41; they are *perf.* 14 or *compound of 11 and 14.* These stamps can only be distinguished with certainty by marginal letters; they can be supplied in this condition in blocks of four at prices varying from 2/6 to 4/- or single stamps without marginal letters at 3d. each.

Stamps of Types 47, 48, and 49 have a small dot as described in note after No. 303b.

The stamps of Type 46 are surface printed and may be distinguished from those of Type 40 by various differences. The rosettes in the upper corners are very much altered, the shading on the drapery of the central figure is vertical instead of diagonal, while the lines on the geographical globe are diagonal instead of vertical. The words "UNIVERSAL POSTAGE" are slightly smaller, while the turret of the ship in the background is totally different. The waves close to the bow have almost disappeared, and the scroll-work round the sides is very much heavier and more distinct. The paper is chalk surfaced.

The stamps formerly catalogued on almost white paper are probably some from which the bluish color has been discharged.

As the value of these stamps depends entirely on condition, the prices quoted are for fair average specimens only.

Reprints of all four values were made in 1890 on thin, hard, white paper. The 1d. is brown, the 3d. blue, the 6d. deep green, and the 1s. violet-black.

The above are electrotyped in sheets of 120, made up of 30 groups of four stamps. There are four different types in each group, and two such groups of four are known of the 1d. and 2d., thus giving eight varieties of these two values. There was some resetting of the first plate of the 1d., and there are several plates of the 2d.; the value in the first plate of the latter value is in thinner letters, and in the last plate three types in each group of four have the "TW" of "TWO" joined, the letters of "PENGE" are larger and therefore much closer together, and in one type the "o" of "two" is oval, that letter being circular in the other types. In the first plate (Die I.) the white horizontal line of the triangle in the upper right corner merges into the outer white line of the oval above the letter "L" of "QUEENSLAND." In the later plates (Die II.) this line does not touch.

The above are electrotyped in groups of four as previously. In the 1d. the words of value are followed by a full stop. There are four types each of the 4d., 6d., and 1s., eight types of the 1d., and twelve types of the 2d.

(b) Perf. 9½ × 12.

These are from new plates; four types of each value grouped as before. The 1d. is without stop. In all values, Type No. 2 in each group of four has the "L" and "A" of "QUEENSLAND" joined at the foot and Type No. 3 of the 2d. has "P" of word of value with a long downstroke. Varieties are known (perf. 12) in which the "P" has been made normal, probably by hand on the plate.

In Type 12 the shading lines do not extend entirely across, as in Type 11a, thus leaving a white line down the front of the throat and point of the bust.

The 1d., vermilion-red, is known *imperf.*
 This issue is perforated by a new vertical-comb machine, gauging about 12½ × 12½. The 3d. is from a plate similar to those of the last issue, No. 2 in each group of four types having "L" and "A" joined at the foot. The ½d. and 2½d. are likewise in groups of four types, but the differences are very minute. In the ½d. the watermark is sideways. In the retouched plate of the 2d. the letters "L" and "A" no longer touch in No. 2 of each group, and the "P" in No. 3 is normal.

The head has been redrawn, the top of the crown being made higher, so that it touches the frame, as do also the back of the chignon and the point of the bust. The forehead has been filled in with lines of shading, and the figures in the corners appear to have been redrawn also.

Type 32 is a second redrawing of Type 21. The forehead is again plain, and though the top of the crown is made higher, it does not touch the frame; but the point of the bust and the chignon still touch. The figure in the right lower corner does not touch the line below, and has not the battered appearance of that in the first redrawn type. The stamps are very clearly printed, the lines of shading being distinct.

The supply of 6d. stamps printed by Messrs. Perkins Bacon and Co. lasted till the year 1873.

(Lithographed by Maclure, Macdonald, and Co.
London.)

1869. Type 1. Perf. 11.

1 | 3c., brown on yellow 7 6 15 0

Specimens are known used, printed from an
engraved die or plate, in orange-brown on deep
yellow surface-coloured paper, and perf. 12.
These are probably die proofs which may have
been given away to collectors after having been
obliterated.

1871. Type 2. Perf. 11.

2 | 3c., brown on yellow 0 6 1 0

Variety with stop after "THREE."

3 | 3c., brown on yellow

Other varieties may be found, of which the
more prominent are as follows: narrow first "A"
in "SARAWAK" and "R" with long tail in left
lower corner.

Specimens are known similar to those mentioned
in note after No. 1.

types of each value differing mainly in the lettering
of the tablets of value. The variety with long-
tailed "R" in left lower corner is to be found in
the 2 c.

TRANSVAAL

LATE

SOUTH AFRICAN REPUBLIC.

I. FIRST REPUBLIC.

NOTE.—For the 1d., 3d., 6d., and 1s. stamps, Types 1 and 2, two plates of each value were made, each plate consisting of forty stamp blocks, arranged in five rows of eight in a row.

The two plates of a value were sometimes, but not always, used together, producing a sheet of eighty stamps in two panes of forty each.

One block was inverted in the original left-hand plate of the 6d. and also of the 1s. In the panes of the printed stamps this was No. 25 on the right-hand pane in the 6d., and No. 1 on the right pane of the 1s. From this cause arose the *tête-bêche* varieties of these two values in some of the printings; and later, when these stamps were overprinted, an inverted surcharge is found whenever these panes were so treated. In addition to this, in the case of the 1d., 3d., 6d., and 1s. stamps it is known that at least one sheet each of these values must have been printed with the whole surcharge inverted.

SCHWEIZER RENECKE.

On 19th August, 1900, on the occupation of this place, certain stamps were overprinted "BESIEGED" with a handstamp in violet, and also with the Post Office obliterating stamp, which gave "SCHWEIZER RENECKE, Z.A.R.", in a circle, with date in centre. Other values were similarly treated between the above date and 21 October, 1900. This defacing of the stamps does not, in our opinion, constitute them a particular issue, such as those given in this Catalogue.

NOTE.—The stamps so treated were the current Cape of Good Hope ½d. and 1d., and the Transvaal ½d., 1d., 2d., and 6d.

TOO LATE STAMPS.

The handstamp "TOO LATE" was struck on stamps by post office clerks to oblige their friends, but was never authorized for use. The handstamp was, however, accidentally employed as a cancelling stamp on letters upon which a too late fee had been paid.

Various stamps are known with the overprint Type 53, most of which are forgeries, although the 1d. and 2d., *wmk. Crown CC*, *perf. 14*, were so overprinted, but purely for fiscal purposes. (See *M. J.*, vol. ii. p. 130.)

OFFICIAL STAMPS.

Stamps of the various issues from 1854-85 are found with a circular hole punched out, the earlier size being about 3 mm. in diameter, and the later 4 mm. These were used on official correspondence. This system of punching ceased in 1886. Any in stock will be supplied at the same price as similar stamps without the hole. Stamps from No. 98 onward exist punctured "O.S."

ALL THE WORLD IN ONE VOLUME.

FOR some years past we have had a great demand for a simple Album, fully illustrated, with a square for each Stamp, and omitting all minor varieties.

It is essential that an Album of this description should be in one volume, and in order to make this possible we have had to print it upon both sides of the paper and to rigidly cut down varieties.

With the aim before us of producing a book to suit the great bulk of *general* collectors, we have, after much consideration, decided to limit THE IDEAL ALBUM to the *Postage Stamps of the World*, and to omit all such varieties as Postal Fiscals, Official or Service Stamps, Postage Due or Unpaid Letter Stamps, etc. etc.

This Album is arranged strictly alphabetically—thus Vathy will be found under the V's and not in French Consular Offices, Aitutaki under the A's and not after New Zealand, etc. etc.

IDEAL No. 1011.—On good quality paper, strongly bound in cloth, sprinkled edges, gold lettering on front. Weight, 7 lbs.

Price, 12/6; or post-free in U.K., 13/1.

IDEAL No. 1012.—As last, but *interleaved* to prevent Stamps rubbing. Weight, 10½ lbs.

Price, 17/6; or post-free in U.K., 18/5.

IDEAL No. 1013.—Sumptuously bound in *half morocco*, gilt edges and lettering, and *interleaved* as Ideal II. Weight, 11 lbs.

The Sectional Imperial Album.

A Printed Album on the Loose-leaf System.

FOR many years past collectors have asked us for an Album on the well-known principle of the Imperial Albums, but having movable leaves, and this want is fully supplied by the new Album.

There has been great objection to the Imperial Album, published in 1903, as it consisted of three large books, and young collectors with 2000 or 3000 varieties found their stamps lost in so large a space. In addition to this we have found by long experience that very few collectors want to collect the stamps of the whole World, but prefer to take up certain Continents, Countries, or Groups of Countries.

We are providing for all requirements by means of THE SECTIONAL IMPERIAL ALBUM. As its name implies, the Album will be in Sections, and *each Section will be sold separately.*

EACH COUNTRY CONSTITUTES A SECTION, and collectors can thus decide what countries they will take up, and buy those sections only. When they want to add fresh countries to their collections they can do so at a very low cost.

The leaves of the Album are loose, and special cheap binders are supplied to hold them. These binders will each hold any number of pages from thirty up to nearly four hundred.

On the left-hand page there is a full description of all stamps, with illustrations of all types and watermarks. Each stamp is numbered, and on the right-hand page there is a corresponding number under a square or rectangle of the correct size of the stamp; hence the beginner will have no difficulty in placing the stamps in the correct spaces.

The numbers to the stamps and squares correspond to those given in the particular Edition of our Catalogues current when each Section was published; so collectors who want to fill up certain spaces can turn to the Catalogue to see the price, and can send us a want list consisting only of the name of the Country and the number of the square. All stamps given in our Catalogues will have spaces provided for them.

Some collectors may not want to collect such things as Postal Fiscals, Official, or Postage Due stamps, etc. etc. Therefore this new Album has been so arranged that the pages for these are quite separate from those of the ordinary Postage Stamps, and can be removed without interfering with the rest of the Section.

Collectors will not have to wait until the whole Album is printed, as each Section will be put on sale immediately it is ready.

The price of a Section varies according to the number of pages occupied, from a few pence to several shillings each. As each Section is ready it will be advertised in the *Monthly Journal*, to which we refer our readers for further particulars as the Sections appear.

As Editions are exhausted, Sections are revised and brought fully up to date. With the exception of the *first edition* of Nos. 1 to 64, and 238, 239, all Sections have the DATE OF PUBLICATION on the front page, and as the date of the edition current at any time of each Section will be mentioned in all advertisements, collectors may see if later editions of any Sections they possess have been published. All undated Sections were published during 1908: Nos. 1 to 47, previous to August; Nos. 48 to 64, previous to November; No 238, in December, 1908.

The Sectional Imperial Album

THE BINDERS.

SPECIAL BINDERS have been made to hold loose sections: they are of the simplest possible description, and will hold from twenty to nearly two hundred leaves. The binders have a spring grip, on the principle of our well-known "Simplex" Album.

To insert or remove leaves from the binder, it is only necessary to bend it back with one hand and remove the leaves with the other.

When mounting stamps, the spring back cover should be removed and the pages laid out quite flat.

Size of Binder,

$11\frac{1}{8} \times 10\frac{7}{8}$ in.

MOVEABLE-LEAF ALBUMS.

THE WELL-KNOWN

“ORIEL” and “PHILATELIC” MOVEABLE-LEAF ALBUMS,

Described on pages 34, 35, and 36, are now made in two styles (excepting “C” and “D”).

Both styles are sold at the same prices, and the following short explanation may help collectors to decide as to which of the two systems they prefer.

“OLD STYLE.”

We term one system the “Old Style” because we have supplied albums on this principle to many thousands of satisfied collectors during the past thirty years.

The system is very well known, two pegs being attached to the binding of the book, on to which double linen-jointed leaves, punched with two holes at the left-hand side, are threaded. The leaves are held in position by a sliding bar in the upper portion of the binding. The illustration on page 20 should make the working of this system quite clear.

“FACILE.”

To our minds the “Facile” system, protected by Royal Letters Patent, is a decided improvement on the “Old Style.”

1041.

SHOWING LEAVES RELEASED.

The leaves instead of being threaded upon pegs have a groove cut across each end of the linen joint, and, together with a protecting cover, are held in position by means of two “V”-shaped projections, the whole being securely fastened by an ingenious spring.

When it is desired to remove the leaves it is only necessary to release the spring, when the “V”-shaped projections open automatically, and the contents can be removed with one hand. A great feature of this improvement is that a single leaf can be inserted or detached without disturbing the contents of the Album. Collectors already using the “ORIEL” or “PHILATELIC” “Old Style” can conveniently continue with the “FACILE.”

Leading Features of the “FACILE.”

1. It is undoubtedly the “acme” of loose-leaf Albums.
2. Changing position of, or adding to, the number of the leaves can be effected instantly and without disturbing contents of Album.
3. The binding of cover being rigid, all possibility of friction between the leaves is prevented.
4. The patent binder has no loose or detachable parts, and therefore cannot get out of order.
5. The action of the patent binder is automatic, and can be perfectly understood the moment it is seen.

THIS Work is an absolute necessity to the careful Philatelist, who is naturally anxious to ensure the absence of forgeries from his collection. Every endeavour has been made by the Author, in the description of new and dangerous forgeries, etc., to bring the work fully up to date. Amongst the numerous additions may be noted an elaborate description of technical terms met with in the course of collecting. THE "PHILATELISTS' VADE MECUM"

(SECURED BY LETTERS PATENT)

Is an entirely New and Original Invention for enabling Collectors to Mount Stamps without handling them, and is a *multum in parvo* of Philatelic requisites.

IT consists of a pair of broad-headed flat metal tongs, one of which is fitted with a solid wedge. The object of this is to permit the free end of a mount held by the tongs to be bent over, moistened, applied to the back of the stamp, and pressed down, and the mount can then be released, the stamp lifted, the other end of the mount moistened, and the stamp fastened thereby on the page. In the handle is inserted a glass of high magnifying power. On one side of the middle part is a millimètre scale (divided to half millimètres), and on the other a two-inch scale (divided to sixteenths), both accurately marked off. The stamp can be firmly held along either scale by the tongs. The tongs are made of solid nickel, polished, and fit into a handsome velvet-lined case, the size of which, when closed, is slightly less than 6 inches long, $1\frac{1}{2}$ inches wide, and only $\frac{1}{2}$ inch thick.

In leatherette, velvet-lined snap case. Weight, 5 oz.

No. 1089. Price 2s. 6d. Postage, 2d.; Brit. Col. and U.S.A., 5d.; Foreign, 9d.

Surcharge Measurer

LENGTH 4 INCHES. MAXIMUM OPENING, 37 mm.

1090.

THIS instrument is made of the best nickelled steel, highly polished, and has a very fine screw adjustment. The points are adjustable and are blunted at one end, so that they may be reversed for carrying. For measuring surcharges and for the detection of forgeries it will be found invaluable, as a forgery is rarely of exactly the same size as the original.

Packed in Neat Cardboard Box. Weight, 2 oz.

No. 1090. Price 4s. 0d.

Post-free, 4s. 1d.; abroad, 4s. 4d.

WATERMARK DETECTOR.

A MOST useful device by means of which most watermarks can easily be seen when stamps are placed on the black-polished surface face downwards. Watermarks that are very hard to see, such as Barbados Stars, United States 1895 issues, will show up clearly if a little benzine is poured into the recessed portion; benzine does not affect the gum or colour of stamps. Size, 3 inches square. Packed in neat cardboard box, with full directions for use. Weight, $\frac{1}{2}$ lb.

No. 1110. Price 6d.

Postage, 2d.; Brit. Cols. and U.S.A., 4d.; Foreign, 10d.

The "Ideal" Perforation Gauge.

The Best, Most Reliable, and in every way the most convenient Perforation Gauge ever invented.

Size $6\frac{1}{2} \times 3$ inches. Printed on best quality granite-grey card.

It is portable, being of a convenient size to be carried in the breast pocket.

It is accurate, every gauge having been carefully measured, and the Gauge itself is printed from an engraved copper plate.

It has *three* sets of gauges (vertical and horizontal) on the same card, by which plan the perforations of stamps arranged in Albums on the hinge system can be measured without taking them from the book; also stamps gummed down can be accurately tested without removal from the book. These are advantages that can be claimed by few, and being printed on stout cardboard, they will not easily crack. In this respect it is superior to those printed on thin paper or any transparent substance. It will not cockle, and damp has but little effect on it.

It has twenty different gauges, from 7 to $16\frac{1}{2}$, and includes $7\frac{1}{2}$, 8, and $8\frac{1}{2}$, not often found in gauges now before the Philatelic public, but which are required more especially for some of the Japanese and Turkish Stamps.

Each dot is bisected by a small vertical line, thus  By this arrangement accurate measurement is guaranteed.

AN "IDEAL" PERFORATION GAUGE.

No. 1086. Price 6d.; post-free, 7d.

TERMS FOR EXAMINATION OF STAMPS.

OWING to the great number of forgeries being offered for sale by unscrupulous persons, a great portion of our time is taken up with the examination of surcharges, cancellations, perforations, added margins and corners, and the scores of other tricks that are resorted to by the faking fraternity.

As this examination can be done only by experts, whose time is valuable, we have found it necessary to increase our charges, which in future will be as follows:—

**ONE SHILLING
PER STAMP.**

Postage and Registration Extra.

In exceptional cases, where special knowledge is necessary, e.g. examination of U.S. grilles or Italian postmarks, additional time will be required to allow of such stamps being sent to the recognized experts abroad.

The stamps should be sent lightly fastened on sheets, with sufficient space above each stamp for the insertion of the desired information. The following abbreviations are used in giving an opinion:—

- “B.” = Bogus, *i.e.* never existed.
- “F.” = Forged.
- “G.” = Genuine.
- “G.F.” = Stamp Genuine, surcharge Forged.
- “R.” = Reprint.
- “W.” = Watermarks.

New Sectional Packets

Of Used & Unused Postage Stamps.

THE Stamps in these packets are all nice clean copies, free from paper, and are carefully mounted in small books. Beneath each stamp is a space to allow of prices being inserted, should any buyers wish to use the packet as an approval selection.

We wish to draw particular attention to the words "Sectional Packets." By this we mean that each section named below contains stamps *which are not included* in the sections which precede or follow it. Thus a customer may purchase sections A and B together for 12/- (1000 stamps, all different) and, later on, add to his collection by purchasing C, which contains stamps not included in A or B. So that sections A to J may be purchased either together in one lot, or singly, one at a time, but in either event the purchaser will become possessed of a collection of 7000 stamps all different.*

If prices are examined, it will be seen that it is cheaper to purchase as many sections (A, B, C, etc.) at one time as possible, i.e. if A to F are bought at one time a packet of 4000 stamps is obtained for £14; if bought singly, the cost of the same stamps would be £15 5s.

DUPLICATE POSTAGE STAMP ALBUMS.

THESE are designed as convenient means of keeping duplicate or superfluous stamps arranged for handy reference, more especially for exchange purposes. These Albums are so arranged as to be suitable for either the general collector or the specialist. The arrangement consists of a series of Pockets, numbered for reference, and securely attached to the leaves, on one side only. The Pockets are so made, that whilst on the one hand they can be quickly opened out flat, and their contents at once seen, there is less liability of any stamps being lost than if they were in ordinary envelopes. By means of the Index, immediate access to any particular stamp is at once ensured. The Publishers can strongly recommend this Album as an easy method of keeping duplicates classified, saving both time and trouble, and ready at hand at once when wanted. Size $9 \times 6\frac{1}{2}$ in.

A FIRST-CLASS BOOK FOR LOOSE STAMPS.

1048.

The LONDON PHILATELIST (the Organ of the Royal Philatelic Society, London) says :

"We have received from Messrs. STANLEY GIBBONS, Limited, a copy of an innovation in the shape of a 'Duplicate Stamp Album.' The novelty consists in the arrangement of a number of envelopes, three of which are securely fastened to each page of the book—each, while readily unfolded, being so contrived that its contents are securely held. Every envelope is consecutively numbered and indexed, so that a ready reference can be obtained to the contents of the volume. We have, after making practical experiments, satisfied ourselves as to the usefulness of these duplicate books, and therefore cordially recommend them to the notice of collectors.

THE ORIEL POSTAGE STAMP ALBUM.

MOVEABLE LEAVES.

THIS ALBUM was based on a special order from Mr. M. P. CASTLE, Vice-President of the Royal Philatelic Society, London, to whom we have supplied a hundred of these books, and to whom reference is kindly permitted. It has met with an unusually favourable reception from those Collectors who have used it, and, on account of its general adaptability, it has undoubtedly taken a front rank in this class of publication. Amongst its numerous advantages, one especially may be named, and that is, its convenient size, rendering it extremely portable, and suitable for attending Philatelic meetings, etc.

Each Album contains 50 detachable hand-made leaves of the very best quality paper, faced with Japanese tissue paper, so as to prevent all friction, and is bound in half red morocco, with cloth sides finished in gold. A space on the back of the cover is left plain, so that a Collector can have his books lettered or numbered to show the contents. Each Album is contained in a cloth drop-in case lined with lamb's-wool. The leaves are supplied with a fine quadrillé background, as supplied to the other Philatelic Albums of this form. Exact size of leaves from the outside edges, $10\frac{3}{8}$ inches by $9\frac{3}{8}$; available for mounting stamps, $8\frac{1}{2} \times 7$ inches.

The price of the Album is as follows:—

No. 1034. "Old Style."	} 30/-
„ 1041. "Facile."	

Post-free, 30/6; abroad, 31/4. Weight, 4 lbs.

The "Old Style" Oriel Album can also be supplied with special blank leaves, *without background*. Prices same as above. Order No. 1034a.

THE PHILATELIC ALBUM.

THE MOST SUITABLE ALBUM PUBLISHED FOR ADVANCED COLLECTORS.

MOVEABLE LEAVES.

SEVERAL important improvements have been introduced into this Album suggested by increased experience, and greatly enhancing the use of this Work. Especially produced in answer to numerous inquiries for a really permanent blank Album. It will be found suitable for the reception of the most extensive and complete collection possible. It is also adaptable for Post Cards, Revenue Stamps, or entire Envelopes. Collectors using Albums of this class frequently resort to books not specially manufactured for the purpose, and hence unsuitable, or the more expensive and very often unsatisfactory mode of having them expressly made; it is to meet this want that this Album is published, and all that experience can suggest has been carried out to make it worthy the use of even the most advanced collectors, and adaptable to any arrangement that may be desirable.

It is likewise especially applicable for the use of those Philatelists who arrange their collections by the Catalogue published by ourselves or any other standard list. This Album is also peculiarly suitable for those who collect special countries only, taking as their guide the various lists published by the Royal Philatelic Society, etc. Each leaf has a double linen joint on an entirely new plan, allowing the leaves to set properly when the book is opened, and giving strength at the same time. A narrow marginal border embellishes each page, with a semi-visible network of quadrillé dotted lines, designed to assist the correct insertion of the specimens to be mounted. The leaves are 100 in number, and printed on one side only, on a very fine quality white card paper. They are moveable, allowing re-arrangement or extension into two or more volumes, as may be desired at any future time. It is hardly necessary to point out the advantage of this; moreover, if a page becomes spoilt, it can be at once replaced. A handsomely arranged title is included. An inspection is desired where possible.
